Subject: Staker Response

Mike Dalley called today and stated that he is unable to find the information we requested in our review. After discussing the problem we decided that the best approach to solve this problem would be to have a joint meeting with DOGM, Salt Lake and Staker to settle on a battle plan. He said that he would make the contacts and try to set up something the first couple weeks in August. I told him we would extend the August 4th deadline until we can have a meeting and figure out the best course of action.
